

MELISSA M. BILEC, PhD, LEED AP

Roberta A. Luxbacher Faculty Fellow

Associate Professor, Department of Civil and Environmental Engineering

Deputy Director, Mascaro Center for Sustainable Innovation

University of Pittsburgh- 153 Benedum Hall, Pittsburgh, PA 15261

Office (412) 648-8075 - Cell (412) 491-5903 - mbilec@pitt.edu - <http://bilecBESE.org>

CAREER SUMMARY

Research

- Research expertise: the built environment and life cycle assessment.
- Published 131 peer reviewed publications: 78 journal articles, 53 conference proceedings. 2 articles submitted, under review.
- Secured: \$8.27 million as PI or Co-PI, including 11 NSF grants and 3 supplements.
- Graduated 12 PhD students and 3 MS students. 4 Post-Doctoral advisees.

Leadership

- Deputy Director at the Mascaro Center for Sustainable Innovation
- NSF AGEP Pitt Strive Director of Faculty Community Building and Engagement
- Year-long women leadership training through Executive Leadership in Academic Technology and Engineering (ELATE).
- Past Leadership: Co-Director of the Center for Sustainable Transportation Infrastructure; Director of the Construction Management Program

Teaching and Education

- Developed a new M.S. in Sustainable Engineering degree and co-developed an Undergraduate Certificate in Sustainability.
- Received four education excellence awards, including Carnegie Science Center Award in Higher Education and funding from NSF for developing innovative engineering education programs; developed five new sustainability classes.
- Invited speaker at NAE Frontiers of Engineering Education Symposium.

Diversity, Equity, and Inclusion

- Leading Diversity, Equity, and Inclusion Learning Community (2019-present)
- Engineering Diversity Advisory Committee (2017-present)
- NSF Pitt STRIVE Leadership team (2018-present)
- Co-faculty advisor for SWE (2018-present); Graduate Women Engineering Network co-faculty advisor (2015-2017)
- School of Engineering Diversity Award (2017-2018)

Highlighted Service

- ASCE Architecture Engineering Associate Editor and Special Editor for Circular Economy and Regenerative Buildings; Managing Guest Editor for Special Issue on Sustainable Healthcare in Resources, Conservation, and Recycling; Subject Editor for International Journal of Life Cycle Assessment; PLOS ONE Academic Editor; ASCE Natural Hazards Review Associate Editor.
- Corresponding member of ASCE Planning Committee on Global Sustainability.
- Received Senior Vice Chancellor for Engagement's Partnerships of Distinction award, 2019.

International Activities

- Coordinated Brazil component of our NSF IGERT and IRES programs. Hosted Fulbright Fellow and visiting scholars from Sichuan University and CSTB in France.
- Invited to two NSF workshops in China and invited speaker at an international conference.
- US Technical Advisory Group Member for ISO/TC323 Circular Economy
- Invited by the French Government to provide testimony on plastics in the environment.

EDUCATION

Ph.D.	Civil Engineering	University of Pittsburgh	2007
M.S.	Civil Engineering	University of Pittsburgh	1999
B.S.	Civil Engineering	University of Pittsburgh	1997

APPOINTMENTS

2019 to Present:	NSF Pitt Strive Director of Faculty Community Building and Engagement
2017 to Present:	Roberta A. Luxbacher Faculty Fellow
2015 to Present:	Deputy Director, Mascaro Center for Sustainable Innovation, University of Pittsburgh, Pittsburgh, PA
2014 to Present:	Associate Professor, Department of Civil and Environmental Engineering University of Pittsburgh, Pittsburgh, PA
2011 to 2014:	Assistant Professor, Department of Civil and Environmental Engineering University of Pittsburgh, Pittsburgh, PA (tenure stream)
2007 to 2015:	Assistant Director, Education and Outreach, Mascaro Center for Sustainable Innovation, University of Pittsburgh, Pittsburgh, PA
2010 to 2012:	Director, Construction Management and Green Construction Program
2008 to 2011:	Assistant Professor, Department of Civil and Environmental Engineering University of Pittsburgh, Pittsburgh, PA (non-tenure stream)
2007 to 2010:	Co-Director, Center for Sustainable Transportation Infrastructure, University of Pittsburgh, Pittsburgh, PA
2007 to 2008:	Visiting Research Assistant Professor, Department of Civil and Environmental Engineering University of Pittsburgh, Pittsburgh, PA
2004 to 2007:	Graduate Research Assistant, Department of Civil and Environmental Engineering, University of Pittsburgh
1999 to 2007:	Senior Project Engineer, Urban Redevelopment Authority, Pittsburgh, PA
1999:	Structural Engineer, SAI Consulting Engineers, Pittsburgh, PAREFEREED

JOURNAL PUBLICATIONS

My Primary student advisees and Post-docs are underlined, co-advised students italicized, undergraduate researchers are denoted with a "+." Since the meaning of author order varies in sustainable engineering, our collaborative research teams have agreed to the student as the first author, as appropriate, with PI/primary advisor last typically as the corresponding author. For my cv, this ordering begins on journal publication 14. I have also indicated in **Bold*** to denote when I have led (e.g., corresponding author).

Exploration from Pittsburgh and Beyond." **Keynote** - Infrastructure Resilience Division, 2019 Research Forum: Enabling Resilient and Sustainable Communities, May 9-10, 2019, ASCE Headquarters, Reston, Virginia.
- Bilec, M.M. (2016). "Are We Using Buildings to Inspire and Motivate Health and Sustainability?" **Keynote Presentation**, International Conference on Sustainable Design, Engineering, and Construction, May 18-20, 2016, Tempe, Arizona. (Co-sponsored by the American Society for Civil Engineers' Architectural Engineering Institute and Arizona State University.)

Regional Keynotes

- Bilec, M.M. (2020). "Networking for Introverts." Women in STEM Conference, January 18, 2020, Pittsburgh, PA.

International Invited Talks

- Bilec, M.M. (2019). "Circular Economy and Converging on Solutions for Plastics." French-American Workshop, Responding to Plastic Pollution through Science: from research to action, December 12 - 13, 2019, Le Mans, France.
- Bilec, M.M. (2019). "Circular Economy and Converging on Solutions for Plastics." French Parliamentary Office for Scientific and Technological Assessment (OPECST): Study on plastic pollution. Presentation to Senator Angele Preville and Depute Philippe Bolo, Paris, France, December 12, 2019.
- Bilec, M.M. (2014). "Incorporating Big Data into Life Cycle Assessment of Buildings and Green Building Rating Systems." North America-East Asia Workshop on Big Data Analytics for Infrastructure and Building Sustainability and Resilience, September 19-22, 2014, Beijing, China.

National Invited Talks

- Bilec, M.M. (2020). "Converging on Circular Economy Solutions for the Built Environment." International Congress on Sustainability Science & Engineering, August 3-5, 2020, Denver, Colorado. (To occur in August 2020)
- Bilec, M.M. (2019). "A Tale of Two Cities: Exploring Sustainability and Resilience Opportunities and Challenges." The University of New Mexico, NSF Workshop. 4th Annual Resilience

Colloquium, Exploring Connections Between Urban and Rural Communities and Environments, August 6-7, 2019, Albuquerque, New Mexico.

- Bilec, M.M. (2018). "United Nations Sustainable Development Goals and Infrastructure Opportunities." AICHE - Engineers Forum on Sustainability: Technical and Engineering Challenges of Addressing the United Nations Sustainable Development Goals, November 1-2, 2018, Pittsburgh, Pennsylvania.
- Bilec, M.M., Rickenbacker, H.J. (2018). "Environmental Justice and Air Quality." North American Passive House Network's NAPHN 18 Conference, October 17-21, 2018, Pittsburgh, Pennsylvania.
- Bilec, M.M. (2015). "Dynamic Life Cycle Assessment, Indoor Air Quality, and 2030 Districts." NSF Research Coordination Network-SEES: Predictive Modeling Network for Sustainable Human-Building Ecosystems Workshop, October 6 to 7, 2015, Pittsburgh, Pennsylvania. *(Funded by NSF as a part of the Research Coordination Network Program.)*
- Bilec, M.M. (2013). "Waste – Focus on Greening the Operating Room, an 'Affordability' Hotspot." Kaiser Permanente 3rd Environmental Summit, October 4, 2013, Oakland, California.
- Landis, A.E. and Bilec, M.M. (2012). "Life Cycle Thinking in Healthcare and Supply Chain." Invited speaker at Mayo's Sustainability Symposium. Arizona State University, November, 8, 2012, Tempe, Arizona.
- Bilec, M.M. and Copley, N.C. (2012). "Life Cycle Analysis of Delivering an Infant in the US." Invited seminar at CleanMed. May 3, 2012. Denver, Colorado.
- Bilec, M. (2010). "Sustainability: Systems, Buildings, and Materials." American Concrete Institute National Convention. October, 25, 2010. Pittsburgh, Pennsylvania.
- Bilec, M., Landis, A.E., Matthews, H.S., Hendrickson, C.T. (2010) "Sustainability in Education and Research." National Civil Engineering Department Heads Conference, May 26-27, 2010, Pittsburgh, Pennsylvania.

[International, Panelist and Roundtable](#)

- Bilec, M.M. (2018). Invited Panelist for Career Panel. NSF International Workshop on Connecting Woman Faculty in Sustainable Building Research, July 5-7, 2018, Dalian, China.

[National, Panelist and Roundtable](#)

- Bilec, M.M. (2019). Invited Panelist for Ecodistricts Research Forum (National Conference). Eden Hall, Chatham University, November 3, 2019.
- Bilec, M.M. (2013). Editor's Roundtable Panel Discussion. International Symposium on Sustainable Systems and Technology, May 15-17, 2013, Cincinnati, Ohio.

[Seminars at Universities or National Research Institutes](#)

- Bilec, M.M. (2020). "Convergence Around the Circular Economy." Carnegie Mellon University, Civil and Environmental Engineering, May 1, 2020, Pittsburgh, Pennsylvania.

TEACHING EXPERIENCE

Developed five new courses.

Taught synchronous distance learning classes for CEE 1218 (2012 and 2013), CEE 2203, and CEE 3218.

CEE 1218/2218: Design for the Environment: Spring 2009 to 2015, enrollment 20 to 30

Developed new course that was funded by the NCIIA for three years to teach concepts of Design for Environment to both undergraduate and graduate students. The course is a project-based course where students develop innovative sustainable solutions with partners. Co-taught with Drs. Marriott (2009) and Landis (2009-2011). The last two years (2012 and 2013), this course focused on residential energy assessments and leadership. The flipped classroom method was used in 2013. Students completed the assessments in low-income communities.

Recent student quote from flipped classroom: "I think this class is phenomenal...None of Dr. Bilec's classes are the typical 'I'm going to stand in front of the class teach you this you're going to regurgitate something for homework and then we're going to move on.' They are all very progressive and the amount of inclusion that is expected of all the students is very good. The more the students are expected and welcome to be involved with the class the more they will be involved with the class. I learn more this way. Excellent class."

CEE 1610/2610 (previously 1210/2210): Engineering and Sustainable Development: Fall 2010-2015, Spring 2017, Spring 2018, Spring 2019, Spring 2020, enrollment 50-70

Redesigned course teaching concepts of sustainable engineering and industrial ecology. This course uses a mix of innovative teaching approaches, including project-based learning. The general modular framework is (1) a mix of lecture, reading and videos; (2) experiment, game, in-class assignment; (3) in-class debate and writing assignment.

CEE 1617/2217 (previously 1217/2217): Green Building Design and Construction: Spring 2008-2016, enrollment 55-70

Developed new course with modules supported by NSF CCLI project. This course teaches all of the major aspects of green building design and construction, including sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation, and design process. Understanding the entire life cycle of green buildings is a crucial element in green and sustainable engineering.

CEE 2620: Advanced Green Building Design and Construction: Spring 2016, Fall 2016, Fall 2017, Fall 2018, Fall 2019, enrollment 6-15

This course first provides an overview of all the major aspects of green building design and construction, including sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation and the design process. The course then focuses on green materials, energy modeling, indoor environmental quality monitoring, and post-occupancy evaluations. For the delivery of this course, we use a combination of seminars, experiential learning, and green building tours.

CEE 3218: Research Methods for Sustainability: Fall 2010, enrollment ~15

Developed new course to teach basic concepts in research methods for graduate students. Co-taught with Dr. Landis (2010), and included distance learning with Clemson and Virginia Tech.

CEE 3609: Advanced Life Cycle Assessment: Spring 2017, Spring 2020, enrollment 9-10

Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.

Additional courses taught

- CEE 2201: Construction Cost Estimating
 - Fall 2008, Fall 2009 (with distance learning section)
- Engineering Sustainability Capstone (Fall 2011) for IGERT students
- ENGR 1610: Product Realization for Global Opportunities with *travel to Brazil* (Spring 2008)

Recent student comments (2019):

“This class reminded me why I chose to be an engineer. Thank you for inspiring me and thank you for caring for all of your students, it is greatly appreciated.”

“I loved how the whole class was able to **connect via Twitter** about relevant articles and topics. This brought **everyone closer outside the classroom** and can allow us to connect with each other about cool and innovative sustainable solutions.”

“A lot. This class was the **most thoroughly structured and organized class I have taken at Pitt.** Dr. Bilec also provided a lot of articles and accompanying material that contextualized the course material very well. The instructor also did a great job of pushing her **student's thinking and promoting conversation** between peers, things that do not happen in many other classes.”

“The instructor provided **different methods of learning.** There was a week where we played a hands on board game to help grasp how important sustainability is. **She provided lecture style learning, group learning, independent learning so all students could get the most out of the class.** She gave us relative data about Pittsburgh and how the city is looking forward to new sustainable solutions instead of heavily relying on the textbook.”

AWARDS AND HONORS

Senior Vice Chancellor for Engagement's Partnerships of Distinction award, March 2019.

Diversity Award, Swanson School of Engineering (2017-2018)

Served as Member of International Expert Selection Committee - Target GHG Collaborative R&D Program, Natural Sciences and Engineering Research Council of Canada / Ontario Centres of Excellence, July 2017

White House Frontiers Conference, Local Track Lead, October 13, 2016.

Invited to attend the National Academy of Engineers Grand Challenge Scholar Summit at the White House, Washington, DC, October 7, 2016

Roberta A. Luxbacher Faculty Fellow, 2017 - present

Best Mentor- Mentee Team Award (3rd place), Mentor AGEP-TDAE, August 2016

Outstanding Mentor Award, University of Pittsburgh Postdoctoral Association Award, 2016

Carnegie Science Award in the University/Post-Secondary Category, Winner, 2012

National Academy of Engineering: Nominated and selected to attend Frontiers of Engineering Education Symposium in Irvine CA (2011)

Carnegie Science Award in the University/Post-Secondary Category, Honorable Mention, 2011

Lisa Weiland and Melissa Bilec: Upon completion of the "JC Penny" project in Vandergrift it received a "Top Ten Preservation Opportunities Award" for 2010 from the Young Preservationist Association of Pittsburgh (YPA), and was selected as a feature project by ESW national - 2010

Innovation in Educational Excellence Award, University of Pittsburgh (2009)

Best Conference Paper in Sustainability Track. Ries, R., Bilec M., Needy, K. L., and Gokhan, N. M. (2007). "Green Building Construction: Cost/Benefit Analysis of a Precast Concrete Manufacturing Plant." 2007 ASCE Construction Research Congress Proceedings, May 6-8, 2007, Grand Bahamas Island - *Received Best Paper Award*

Performance Award Urban Redevelopment Authority of Pittsburgh (2000 and 2001)

Teaching Assistant of the Year, University of Pittsburgh, 1999

President's Scholarship (1998)

Honors Scholarship (1998)

Deputy Director, Mascaro Center for Sustainable Innovation, 2015 to Present

-PI on MCSI's NSF NRT 2020

-Co-PI on MCSI NSF ERC Planning Proposal 2018

-Co-PI on MCSI's NSF NRT proposal in 2016, 2017, 2018, 2019

-Local Track Lead for White House Frontiers Conference, October 13, 2016.

-Primary lead of P4 Air Measure, convened by the Heinz Foundation, Summer 2016

-Attended Grand Challenge Scholar Program (GCSP) at the National Academy of Engineers and the White House in October 2016. Working to develop GCSP at UPitt.

-2014 to 2017, Created an M.S. degree in Sustainable Engineering.

-2014-2015, Co-created a new University-wide Undergraduate Certificate in Sustainability.

Assistant Director, Education and Outreach, Mascaro Center for Sustainable Innovation, 2007 to 2014

Since 2007, my work with MCSI has evolved as my research enterprise became more prolific. During my tenure at MCSI, major contributions included:

-Coordinated/managed MCSI's Summer Undergraduate Research Program in 2008, 2009, and 2010, including NSF REU site and NSF IRES program. This work included recruitment, application review and acceptance, housing coordination, summer long lecture series, service activities, and book clubs. This also included organizing international travel, Portuguese language training, Brazilian culture training, and research experiences for the IRES program.

- Related to Pitt's first NSF IGERT and GAANN programs from 2007 to ~2011, recruited students, developed international travel coordination (met bi-weekly with students prior to cohort departure), application review, strategic planning meetings, coordinated required classes, budget reviews, annual and NSF and DOE reports.
- Related to Pitt's FIPSE-CAPES, worked closely with both Brazilian students at Pitt (meeting weekly) and with Pitt students traveling to Brazil (meeting monthly) to ensure assimilation and educational requirements.
- Engineering for Humanity Certificate Committee
- Revision to the Sustainable Engineering Certificate
- Worked on many collaborative MCSI proposals including:
 - 2009 ERC proposal, **IN**novating Sustainable Practices through Inter-disciplinary Research and Education: INSPIRE;
 - 2010 Doris Duke, Dynamic LCA;
 - 2010 IGERT, Sustainable Community Oriented Research & Education (SCORE);
 - 2010, 2011, 2012 REU site proposals;
 - 2011 RET proposal;
 - 2011 SRN, Sustainable Consumer Innovations Network (SCINet)
 - 2011 SRN proposal with ASU, A Collaborative Open Innovation Network (COIN) for Sustainable, Healthy Buildings;
 - 2013 Drk12 proposal;
 - 2014 NSF Sustainable Research Network, Re-envisioning Urban Sustainability and Health (RUSH);

Outreach/co-curricular activities to support MCSI's overall outreach work:

- Teach the Teacher Workshop, June 2017, Presented lecture
- Teach the Teacher Workshop, June 2016, Presented lecture
- Teach the Teacher Workshop, June 2015, assisted in organizing and presented lecture
- Teach the Teacher Workshop, June 2014, assisted in organizing and presented lecture
- Green building and indoor environmental quality learning module, Crossroads Foundation and UPitt CS department, July 30, 2013.
- Worked with Rebuilding Together Pittsburgh, Penn State Center, Kingsley Association. Completed energy retrofits (1 per month in 2012-2013) in low-income homes – outcome from student energy assessments developed in CEE1218/2218, Spring 2012.
- Special session at international One Young World Event in collaboration with CMU, Phipps, and MCSI. October 20, 2012.
- Outreach activity with Manchester Academic Charter School. Presentation and activity on Energy. October 18, 2012.
- Presentation to Pittsburgh Public School, SCITECH about Sustainable Engineering, April 18, 2012.
- Outreach activity with Manchester Academic Charter School. Presentation and activity on Energy Supply and Demand. October 18, 2011.

- Outreach activity with Manchester Academic Charter School. Presentation and activity on Sustainability and Limited Resources. September 20, 2011.
- Outreach activity with Carmalt Academy. Seminar presentation and tour of Phipps Botanical Gardens, November 10, 2011.
- Collaboration with Kingsley Association (a comprehensive, culturally relevant, educational, recreational, and social programming that positively impacts the lives of youth, their families and the East End communities) and advised a collaborative CEE and MEMS senior design project, Fall 2009 to 2015.
- Faculty advisor - Carnegie Science Center's Connect to Excellence Program with Shaler High School - Focus on Green Buildings and Indoor Environmental Quality (2009, 2010).
- Faculty advisor for the Greening the Greenhouse community project - received \$5000 in funding to support efforts, lead by funded graduate students, Spring 2010.
- Engineering/Science/Trade Fair for approximately 400 students who have identified an interest in engineering career cluster. Students participating in the program were from Bethel Park, Canon-McMillan, Chartiers Valley, South Park, Mt. Lebanon, Upper St. Clair, South Fayette and Peters Township. Fall 200

Co-director, Center for Sustainable Transportation Infrastructure, 2007 to 2010

As the founding co-director of the Center for Sustainable Transportation Infrastructure in 2007, I worked with co-director, Radisav Vidic, to establish the overall vision and initial research program. The research program was largely supported by the Pennsylvania Department of Transportation (PennDOT), and during this time I worked to secure \$4.5 million with over 20 research projects. During my tenure as co-director major contributions included:

- University liaison with PennDOT to coordinate existing and new research projects
- Project management of all projects from budgets, to schedules, and project deliverables
- Development of the all marketing materials, including launching new website
- Annual University and PennDOT research symposiums
- Participation in the Transportation Research Board
- Workshop Co-Chair for Western Pennsylvania Transportation Research Forum at the International Bridge Conference -2008, 2009, 2010

Director, Construction Management and Green Construction Program, 2010 to 2013

I also served as the Director of the Construction Management and Green Construction program. In this role, I primarily facilitated collaboration and coordination with the adjunct and advisory board members, aligned course offerings and instructors, strengthened relationship with local construction community, and developed new curriculum ideas to enhance the CM curriculum.

PROFESSIONAL EXPERIENCE

1999: Structural Engineer, SAI Consulting Engineers, Pittsburgh, PA

Contributed to the design of new and rehabilitated highway bridges including substructure and superstructure elements

Prepared cost estimates, construction plans, details, and specifications

1999 to 2007: Senior Project Engineer, Urban Redevelopment Authority, Pittsburgh, PA

Managed design and construction contracts including budgeting, scheduling, quality control, and risk analyses

Managed environmental concerns on brownfield sites such as remediation, waste disposal regulations, testing requirements, and site-specific health standards

Developed sustainability and green design policy

Example infrastructure project: Hot Metal Pedestrian Bridge

-Rehabilitation and extension of 100-year old historic railroad bridge with a new truss bridge structure and several new ramping components with a total project cost of \$11,500,000

-Responsible for development of funding program

-Procured and managed design, construction inspection, and construction contracts

Example building project: Four Precast Parking Garages

Four precast parking garage structures with 2,300 spaces totaling approximately \$33,000,000 to support a mixed-use development on a brownfield site

Responsible for managing the design and construction management contracts including developing design consensus from internal staff, community groups, planning commission, and private developer.
